

Test Case

	Project Name:	Bank System	Test designed by:	Taif Al kdm
	Module Name:	Test case for login	Test Designed data:	20/May/2024
	Release version:	Last version	Test Executed by:	Team members
			Test Execution data:	22/may/2024

Pre-condition	1-The bank system is accessible and operational. 2-The user has a valid account in the bank system. 3-The user has valid login credentials (username and password).
Dependencies	1- Availability of the bank system application. 2- Valid login credentials (username and password) for test execution.

Test Priority

Test case	Test title	Test summary	Test steps	Test data	Expected Result	Post-conditions	Actual Result	status	Notes
login	Login Functionality Test	The test aimed to validate the login functionality of the bank system	Access Login Page	Open the bank system login page.	The login page is displayed without errors.	The user's session is terminated upon logout.	PASS: The user is successfully logged in, and the expected dashboard/homepage is displayed.	Pass or Fail	This test case assumes a basic login scenario and does not cover advanced authentication methods like two-factor authentication.
		The test also ensured that the system appropriately handled invalid credentials	Enter Valid Credentials	Enter a valid username and password combination.	The username and password are accepted, and the user is successfully logged into the bank system.	The bank system is in the same state as before the test execution.	FAIL: The user is unable to log in, or the dashboard/homepage is not displayed as expected.		Additional test cases may be required to cover scenarios such as password recovery, account lockout, or session management.
		and maintained security measures such as password encryption and account lockout.	Verify Successful Login:	Verify that the user is redirected to the dashboard or home page after login.	The dashboard or home page is displayed, indicating a successful login.				
			Enter Invalid	Enter an invalid username or	The system displays an error message				

			Credentials	password combination	indicating that the login credentials are incorrect.				
			Verify Error Message	Verify the error message displayed	The error message clearly indicates that the login credentials are incorrect.
